
Applied Dosimetry Aglintsev K.k V.m Kodyukov

use of aqueous glycine solution for γ -ray and fast-neutron ... - transparent plastic and polystyrene are used for β - and γ -ray dosimetry. on irradiation, their uv absorption on irradiation, their uv absorption spectra are displaced towards longer wavelengths [1, 2]. a neutron dose measurement unit - home - springer - spectrum of the applied neutron flux must be indicated. it seems to us that the concept of the dose value or the irradiation dose, similarly to the concept of the x,- and y-radiation dose, should be introduced also for the characteristic of neutron fields.
